

Eos Platinum Filter exchange

Replace the filters according to the filter counter of the display or the voice announcement. Once the filter counter reaches 70liters, the voice announcement is reminding us to get ready for the filter exchange.

To replace the filters, turn off power at the wall switch.

Open the compartment door of the filter 1 on left or filter 2 on right. (Front view)
 Unclip the wire connector on top of the filter cartridge. Turn the cartridge according directions of arrows, as shown on body of cartridge;

Have a container ready as there will be some water draining out of the tired filter cartridge. Then pull cartridge out of the filter housing/socket.

Get new filter cartridge and place in filter socket.
 Turn cartridge according to directions to secure filter in socket, until it reaches the stop point, approx a half turn.
 Fix wire clip on filter chip on top of cartridge.
 Close door of filter compartment door.

Turn on ionizer and flush approx 5 liters, discard water.
 Ready to drink and enjoy !
