

HOMAY CHI

Undersink - Water Ionizer + Alkaliser

The Homay is a little gem for its price

The ionizer can be conveniently turned on and off by using the filter tap on the bench. The Homay Chi is installed into the cold water feed (installer required). The ionizer unit is placed under the bench, and needs to be accessible to change the settings.

How does it work? The Homay Water Ionizer uses a special electrolysis chamber made of 5 Titanium Platinum alloy plates to make the healthiest water. This chamber activates automatically when you turn on the tap.

Convenient!

The **Undersink set** is made out of the Homay CHI, a 3 way filter tap, and additional 2 way prefilters (hollow fibre block, and activated carbon filter for extra strong purification).
