Benchtop Full range of pH choices

EOS REVELATION

Powerful Underbench ionizer with Turbo function.

TESTIMONIALS

"When we first were introduced to alkaline water the price of the machine were very expensive until I started to do research and found your company.

My health has improved. I no longer have to take any medication for my arthritis. It helps keep me relaxed and not stressed out like I was before.

It is very pleasant tasting. Keeps my 80 year old mother's blood pressure steady. Has helped drop my cholesterol level, and my mothers.

I definitely would recommend an ionizer to other people and have done so by sharing water with other people. Why? Because they have seen the improvement in my health and well being.

You supply excellent customer service. Thank you, it has changed my life."

Larry Leyland, Coromandel Peninsula

"Since we have installed an IONZA Water Ionizer in our clinic I have been drinking at least 1-1.5 litres of pH 9.5-10 water daily and have noticed significant differences in my health and wellbeing.

I was getting some acid reflux which completely disappeared within a week. I also flushed 2 kidney stones 2 months after starting the alkaline water – they just spontaneously came out.

The water tastes excellent and I know from my Hemaview Live Blood Analysis its having a profound affect on my health both short and long term. I strongly recommend these units to my patients and friends."

David Holden, Auckland
Naturopathic Physician & Nutritional BioChemist

TOO ACIDIC? STRESSED FEELING GRUMPY ACHING JOINTS LOW ENERGY

HERE IS HOW

IONISED ALKALINE WATER

OFFERS RELIEF

Water for Life

How can just water do that?

Ionised alkaline water has particular properties like renowned Healing Springs around the world.

Isn't my filter enough?

A filter's purpose is to remove contaminants from the water. A water ionizer offers a lot more to support health and wellbeing.

Water is just water, isn't it?

Water is as diverse as leaves on a tree. They look the same, but actually they are all different. Ionised alkaline water has particular properties that help the body to stay vital.

So what does an ionizer actually do?

It makes water alkaline with antioxidants, and microclusters.

Why would I want one?

Accumulated acidity in the body, whether from food, drinks, or stress results in inflammation, disease and aging. The properties of alkaline antioxidant water collectively assist the body to eliminate acidity and reduce inflammation.

Do you want to be vital and alive to see your grandchildren graduate and stay out of the doctors surgery?

A WATER IONIZER CAN HELP YOU DO EXACTLY THAT!

So what could I expect?

You can expect relief from many conditions that result from excess acidity. Further you will appreciate an increase of energy, performance and wellbeing. The relief of cellular stress also supports emotional balance.

Isn't this just another gimmick?

Water ionizers are not new. They are used extensively in Asian countries including in their hospitals.

So what does the water taste like?

Good filtration and ionisation together produce water that is soft and delicious to drink. This is even true of poor city tap water.

Which ionizer would suit me?

Alkaline antioxidant water, sometimes known as Kangen water, can be made with a range of water ionizers. IONZA offers a range that matches you in your budget, aesthetic and performance requirements.
